

How close is the track?

Cars reached speeds of up to 250kph only 3.5 metres from our front doors! Our bedrooms, living rooms and balconies are almost on the track. The noise inside homes was deafening, even with doors and windows closed.

Flying debris from car crashes, road bitumen and rubber chunks from tyres flew over the 'safety' fences meant to protect fans, residents and property.

After racing and well into the night, workers had to make repairs to the new roads so they were ready for racing the next day. Residents had no respite from the event.
